

# CS33 Homework Assignment 7

*Due 11:59pm, November 5, 2021*

1. We covered the *sigsetjmp* and *siglongjmp* functions in lecture (Slides XXI-25 and XXI-26). The *sigsetjmp* function saves some information in the *sigjmp\_buf* data structure so that the caller's context can be restored following a call to *siglongjmp*, resulting in *sigsetjmp*'s returning a second time. What information is saved?
